

Banana DNA

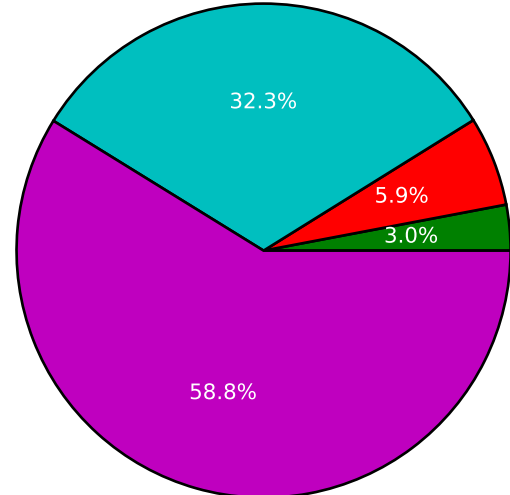

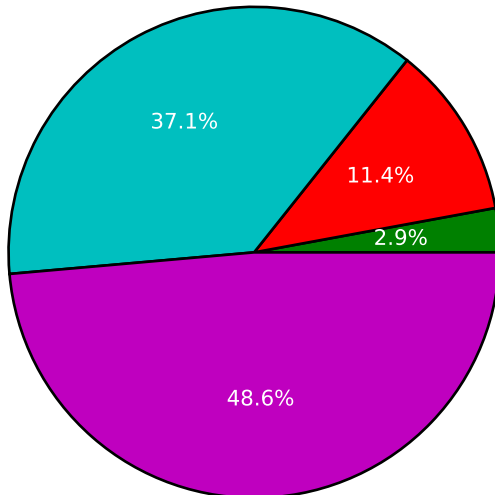

I felt comfortable asking questions at the workshop.

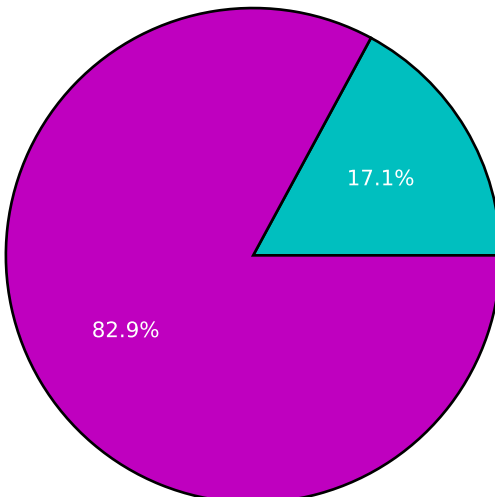

I enjoyed the workshop and learned something interesting.

I think I would enjoy the workshop leaders' job. The workshop made me feel like I can have a job in science, engineering or math.

I enjoyed listening to my workshop leader give their presentation.

Comments

I loved making the DNA show and get out of the banana. it was so cool i wish i could come next year too. Hopefully I am. I loved this session more than all of them. <3 Great being with you guys!

I loved this workshop. I learned so much and felt like a professional scientist doing the experiment. I loved the teachers and the well-thought out activities. 10/10

I think this workshop is cool and fun, I especially liked the chocolate the workshop leaders gave me

You should use many other fruits and veggies!

it was really amazing how we took the DNA out of the banana because I didn't even know it was possible.

What experiences did you go through that made you want to do science?

Thank you for explaining the directions and having patience

I have done this before in my bio class but the steps were a little bit different and I remember doing this at a museum when I was little which I still have the DNA from.

This was one of the best workshops. The leaders and everyone was so nice. (note: these "strongly agree" were actually in a column written in labeled "I LOVED IT")

Thanks! (all the "strongly agree" boxes had 5 check marks and an infinity sign)

maybe a different fruit

thank you for showing me this experiment and I am thinking that I am going to be a scientist when I grow up.
