It's All Fun and Games: The Coding Concepts Behind Common Games
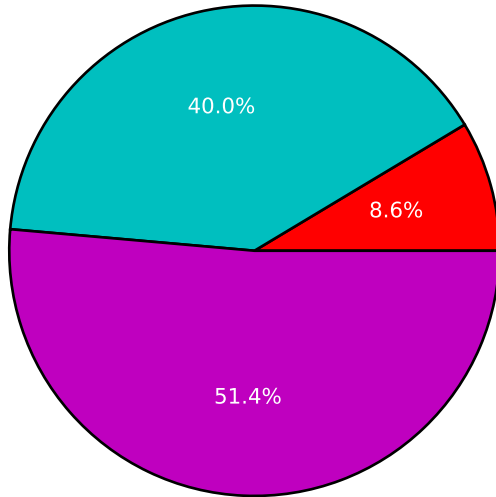

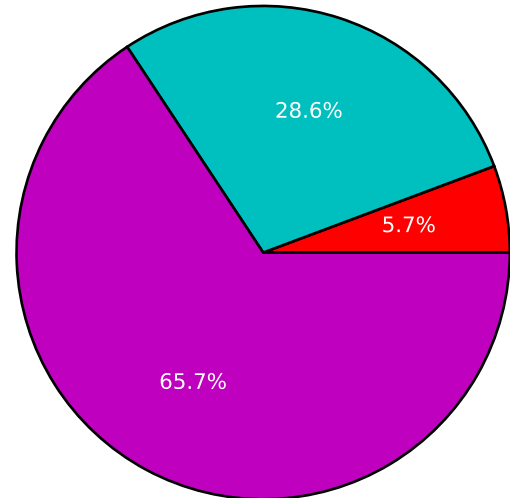

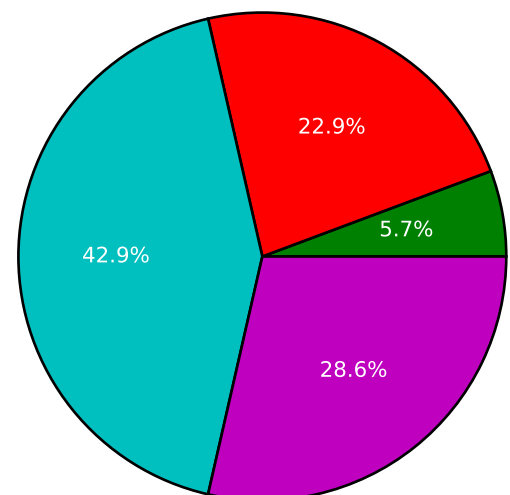

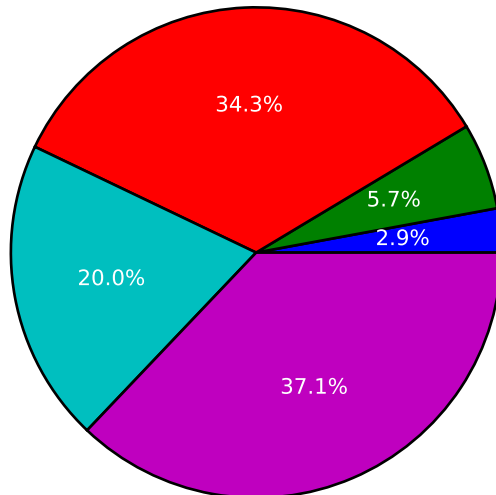

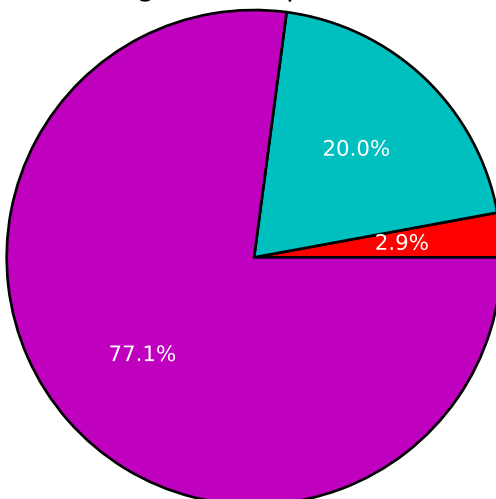

Comments

You should have more time to play uno

good way of explaining how science has to do with games.

I think I would like being on this job even though I would have to learn coding languages.

Enthusiasm made me want to CODE!

Have more red sunglasses (I really wanted a red one), I really liked the dolphin

I liked the way the leaders taught us different ways in order of cards

Thanks for the class!

Thank you for showing us this fun experience.
